

M-385

The Network Box M-385 is the top-of-the-line M-Series system, from the Network Box S-M-E range. This high speed 19 inch rack mounted unit, is intended to protect more demanding medium-sized organizations. The Network Box M-385 has all of the threat protection capabilities of the Network Box Enterprise range of models; no security compromises have been made. Updates to every Network Box system are performed in real-time, using multi-award winning PUSH technology. Whenever a new antivirus signature, security patch, or software update becomes available, it is pushed out to every Network Box around the world, in an average of less than 45 seconds. No other UTM (Unified Threat Management) system even comes close.
