PROGRAMME

- Easy to use networking scanning solution for emailing, printing, faxing and filing paper documents
- Small footprint makes it easy to install in a variety of locations
- Large touch screen display enables easy viewing and data entry
- Robust 50-page Automatic Document Feeder (ADF)
- Built-in keyboard for complete capture routine support (with lay-on German, Italian, French and Spanish keyboard layouts)
- Seamless integration into ECM solutions through SDK

THE POSSIBILITIES ARE INFINITE

fi-6000NS Specifications

Multi language turn-key network scanning solution with a small footprint and high performance

The Fujitsu fi-6000NS Network Scanner is the first scanner that combines the intuitive, easy installation of a desktop scanner with the productivity of a network scanner. It is an easy to use scanning solution for sharing documents in today's multi-location, global environment.

Network scanning, collaboration, emailing and faxing just got a lot easier. Simply load your documents, log into the network, select the destination, and press the scan button.

The multi language fi-6000NS scans in colour or monochrome at duplex speeds up to 50 ipm. With a 600 dpi optical resolution, image quality is among the best in its class.

Not only does the network scanner offer ultrasonic double feed detection and long document scanning support (up to 863 mm), it also features hard card scanning capabilities (ISO7810 standard) and embossed card scanning through the main automatic document feeder (ADF). With its very compact footprint the

fi-6000NS installs easily into even the most crowded environments, including front office and back office locations. Not only does it take up minimal space - an impressively small surface area of 310 x 410 mm is all that is required, but also because it can scan to a network fax system, scan to email and to shared network folders, it saves space as well as money by eliminating heavy and bulky printers, fax machines and copiers that are no longer needed.

Featuring a large touch-screen display and a built-in keyboard (available in English as standard with German, French, Italian and Spanish as keyboard lay-ons), the Fujitsu fi-6000NS offers input capabilities similar to a computer. Need to email a document? Scan it, enter the email address and touch the send email icon. Need to share a document? Just scan it to a PDF and send it to the office next door, or to an office around the world.

Increase productivity and decrease costs. The fi-6000NS scanner does it all.

Model		fi-6000NS
Technology		Dual Colour Charge coupled device (CCD) image sensors, 80 Gb SATA 3.5 in HDD
Resolution		Optical: 600 dpi / Output: 150, 200, 300, 600 dpi
Halftone patterns		Dither and error diffusion automatic
Colour		24-bit single pass colour, auto colour detection
Scanning speed		Simplex: 25 ppm (200 dpi), Duplex: 50 ipm (200 dpi)
Scanning mode		Simplex and Duplex
Document feeding mode		Automatic document feeder (ADF)
ADF capacity		50 Sheets (A4: 80 g/m ²)
Document size		ADF minimum (A8) (53 mm x 74 mm)
		ADF maximum (Legal) (216 mm x 356 mm)
Network protocols		TCPIP DHCP, SMTP, SMB, LDAP and SNTF
Network server		Windows 2000 or 2003 Server required
Output methods		TIFF, MTIFF, JPEG, PDF, searchable PDF's (English)
Interface		One network connection RJ45 10/100 base T
Software driver support		All software loaded on system (embedded)
JPEG compression		Hardware; choose from 7 different levels
Power requirements		100 – 240 VAC, 50 / 60 Hz
Power consumption		Scanner 28-34 W, Energy saving mode: 6 W or less
		Computer 88 W or less, Energy saving mode: 10 W or less
Operating environment		Temperature 42° to 95° F (5° to 35° C)
		Relative humidity 20% to 80% (non-condensing)
Dimensions (W x D x H)		315 x 415 x 281 mm
Weight		13 KG
Automatic image processing		Auto deskew, auto orientation, auto page size detection and blank page detection
Security		Password protected (PDFs), login authentication (LDAP)
Touch panel		Screen size 213 mm XGA (1024 x 768 pixel) TFT colour monitor
		Type Analog resistive touch display
